

MEGHAVATH GANESHNAYAK

****Data Science & AI Engineer**** | Hyderabad, India

****Phone:**** +91 62818 24455 | ****Email:**** meghavathganeshnayak@gmail.com

****LinkedIn:**** [linkedin.com/in/meghavath-ganeshnayak-3bb2602a5](https://www.linkedin.com/in/meghavath-ganeshnayak-3bb2602a5) | ****GitHub:**** github.com/3132Ganesh

SUMMARY

Data Science undergraduate with a focus on ****AI Engineering**** and ****Big Data Analytics****. Expert in building end-to-end AI systems, including RAG (Retrieval-Augmented Generation) pipelines and predictive modeling for complex domains like healthcare and energy. Proven ability to bridge the gap between raw data and actionable intelligence through full-stack development and advanced machine learning.

SKILLS

- ****AI & ML:**** Generative AI (LLMs), RAG Architectures, Graph Neural Networks (GNN), Sentiment Analysis, Computer Vision (face-api.js).
- ****Data Engineering & Analytics:**** SQL (PostgreSQL, MySQL), Big Data Analytics, Molecular Docking, Statistical Modeling, Data Visualization (Recharts, Tableau).
- ****Languages & Frameworks:**** Python (Advanced), TypeScript, Node.js, Express, React, Java, R, HTML/CSS.
- ****Tools & Infrastructure:**** Git, Supabase (Postgres), Drizzle ORM, Docker, VS Code, OpenAI API, Anthropic API, Spotify/Notion APIs.

PROJECTS

****Mood-Aware: AI-Driven Personal Intelligence Ecosystem****

AI Engineer & Full-Stack Developer | [GitHub Link]

- Developed a sophisticated ****RAG-based AI wellness advisor**** using OpenAI and OpenRouter, synthesizing cross-platform data (Notion, Spotify, Mood Logs) to provide empathetic, real-time insights.
- Engineered a ****Data Integration Pipeline**** to ingest and analyze user reflections from Notion and listening patterns from Spotify, correlating digital activity with emotional well-being.

- Implemented **Computer Vision** features using `face-api.js` for real-time facial emotion recognition, automating mood tracking via webcam.
- Architected a secure full-stack system with **React 19, TypeScript, and PostgreSQL (Supabase)**, ensuring high performance and 99.9% data integrity through Drizzle ORM.
- Designed an **AI Planner** that generates personalized 7-day wellness interventions based on multi-dimensional user habit and stress analysis.

Early-Stage Drug Discovery using Molecular Docking

Lead Data Scientist

- Engineered an AI-driven screening pipeline using **Graph Neural Networks (GNN)** and AutoDock Vina to predict drug-likeness and binding affinities with **92% accuracy**.
- Processed large-scale molecular datasets to identify potential inhibitors, reducing early-stage discovery timelines by 40%.
- Led a 3-member team to present findings at a national roadshow, securing top-tier recognition for technical innovation.

EXPERIENCE

- **Team Lead | Drug Discovery Roadshow:** Orchestrated research, data modeling, and final presentation for a high-impact AI-in-Healthcare project.

EDUCATION

B.Tech in Data Science | Gokaraju Rangaraju Institute of Engineering and Technology (GRIET)

2023 – 2027 | Current Standing: 7.0 CGPA

CERTIFICATIONS

- **Generative AI Specialist:** Specialized in transformer architectures, LLM workflows, and building production-ready GenAI applications.
- **Data Science 101 (IBM/YL-PTECH):** Certified in statistical analysis, predictive modeling, and data visualization.
